AI/Software Engineer

Computer science student and emerging Web and Mobile developer with hands-on experience. With practical exposure to machine learning frameworks including TensorFlow. Adapt at working across software development cycle, from system design and implementation, testing and deploying. Experienced in remote data management, confidential record handling, and digital workflow optimization. Seeking opportunities in computer science principles and full-stack development skills in IT environment. A proactive learner with excellent analytical and problem-solving skills and a team player.

Education

Bachelor of Science Computer Science ZCAS University, Lusaka, Zambia	Feb 2023 - Present
High School Certificate Breath of Heaven Academy, Lusaka	Jan 2019 - Nov 2021

Employment

Property Manager (Remote) New Life Properties LLC, Lusaka, Zambia	Jun 2024 - Present
- Managed end-to-end property listing lifecycle onboarding, updates, and tenant communications using cloud-based property management tools - Maintained and organized confidential tenant and lease records, applying strict data security and access control practices - Improved operational efficiency by 30%+ through digital workflow automation and systematic document organization - Acted as primary point of contact for tenant inquiries, demonstrating strong written communication and professionalism - Coordinated lease agreements, renewals, and compliance documentation across a remote, cross-border team	

Courses

Relevant Coursework	Present
- Programming Fundamentals (C / Java / Python) - Data Structures and Algorithms - Object-Oriented Programming - Web Application Development (Frontend & Backend Systems) - Database Systems & Management (SQL Design & Implementation) - Operating Systems Concepts - Computer Networks & Data Communication - Computer Architecture & Digital Logic Design - Software Engineering (Requirements, Design & Architecture) - Computer & Network Security (Cybersecurity Principles) - Artificial Intelligence & Decision Support Systems - Mobile Application Development(frontend and Backend) - Human-Computer Interaction	

Hobbies

- Basketball
- Photography
- Hiking
- Music

- Distributed Systems & Cloud Concepts
- Cryptography & Information Security

Projects

NLO Real Estate Property Listings Web Application

[Responsive multi-page property listings platform with Firebase backend and Netlify deployment](#)

- Architected and deployed a responsive, multi-page property listings platform using HTML, CSS, and JavaScript with a luxury navy-and-gold design system
- Integrated Firebase Authentication for secure user access and Firestore (NoSQL) for real-time data management
- Deployed to Netlify with continuous delivery pipeline; optimized for performance and cross-browser compatibility
- Applied UI/UX best practices including mobile-first responsive design, structured content hierarchy, and accessible layouts

Mobile-Healthcare System (In Progress)

Jun 2026 - Present

[Healthcare system for early detection and diagnosis of prostate cancer](#)

- Designing a healthcare system that helps with early detection and diagnosis of prostate cancer
- Implementing appointment scheduling, provider matching logic, and HIPAA-aligned data handling principles
- Developing full-stack AI model with machine learning techniques to analyze data, flutter frontend, Firebase Authentication, and Mysql with a chatbot

ZCAS Online Voting System(In Progress)

May 2026 - Present

- a secure full-stack web application for managing student elections, featuring authentication, role-based authorization, and real-time vote processing.
- Implemented secure database integration for storing voter credentials and election results, ensuring data integrity and transparency. The system emphasizes cybersecurity best practices and scalable architecture for institutional use.

Core Competencies

Core Competencies

- Full-Stack Web and Mobile Development
- Cloud Deployment & Hosting
- Firebase Architecture
- Data Security & Privacy
- Network Security Fundamentals
- Remote Team Collaboration
- Analytical Problem Solving
- Digital Workflow Optimization
- Technical Documentation
- Agile Learning & Adaptability
